

DPRS - JOIN NOW!

One person who knows, well more than average, about Dutch medium wave pirate stations is Derek Taylor, the operator of the Dutch Pirate Radio Service, now expanding and becoming better than ever before. In fact, the DPRS is now offering a membership.

Yes, you can join the DPRS!

After paying a membership fee of just 10 pounds for one year, you'll receive priority attention, all of your reception reports will be forwarded directly to the free radio stations free of charge.

The DPRS include a return stamped addressed envelope along with your report, a ready-prepared QSL for those stations that have no QSL's, and also a covering letter in Dutch. So in fact you don't even have to write a letter.

When joining the DPRS and sending a reception report, all you need to do is write out the report and we'll do the rest! Let the experts get that QSL for you. The DPRS has 30 years experience and over 400 Dutch medium wave pirate QSL's.

We are the approved and renowned service for you. If you wish to send a tape to a Dutch pirate, there's no extra charge for this. And in fact you don't even have to know which pirate you're listening to from The Netherlands, because when joining the DPRS you also get a free identification and information service.

Join now! The cost for one year is just 10 pounds.

Send to:

DPRS, 12 Dorman Road, Preston PR2 6AS, ENGLAND

We're operating in close conjunction to the Dutch pirates. All you have to do is listen, and the DPRS will do the rest!

PIRATE CONNECTION 6

The Scandinavian Free Radio Magazine

Kämnärsvägen 13D:220, 226 46 Lund, Sweden

PC IS BACK! IN THIS ISSUE:

- * THE FINAL DAYS ONBOARD MV PEACE
- * XMAS AIRED PHONE SEX!
- * MV FURY RAIDED!
- * RADIO ORANG UTAN RAIDED!
- * RADIO MERLIN INT'L RAIDED TOO!
- * DEREK TAYLOR
- * ADDRESS LIST OF ALL SW- & MW-PIRATES
- * KIM HAWK's STARRY THOUGHTS...!

Heavy Dude Radio's 70 W transmitter in operation.

This is **Pirate Connection**, a Free Radio magazine focusing on Scandinavian, European and North American pirate radio. PC is published 5 times a year (January, April, June, August, October) and the contents will in many respects be dependent on contributions from our readers. Everyone is therefore invited to send in just anything that may be of interest, news, logs, articles etc.

Subscription rates

Subscription 1 year (5 issues): Sweden SEK125, Scandinavia SEK150, Europe and surface mail outside Europe SEK160/\$20/£14/DM35, Air mail outside Europe SEK180/\$23, Regular editors SEK100/\$13/£9/DM22.

Sample copy: Sweden SEK25/4IRC, Elsewhere SEK30/\$4/£2.50/5IRC.

The money can be sent by cash (in any currency) to Stefan or be sent to Stefan's personal postal giro account 690708-2710 (add SEK28 if transferring to our giro account from abroad!!!). Please don't send any checks or coins.

Editorial

Believe it or not, we are back! Let me first of all apologise for the break of PC. I've been working in Stockholm for the last 7 months and I couldn't possibly publish PC. I was too busy with my work there. Nor had I the time to answer all worrying letters I got, but let me now take the opportunity of saying a big 'thank you' to all of you that have encouraged me to continue the work. Since Free-DX (a weekly Free Radio news bulletin with logs and info) has closed down, I've also decided to publish a similar newssheet called the "48 report" and please find enclosed the latest edition of it. Actually it's not a new bulletin, because it has been available on Internet since last year. The 48 report will be published each Tuesday and is offered free of charge to you if you have an e-mail address. It is also offered on a printed A4 paper and you'll find details on subscription in the report. This issue reports on the closure of Voice of Peace, both Chris Edwards from Offshore Echo's magazine (which is our latest recruitment and will write about the latest developments on the Offshore scene) and Nathan Morley, DJ on Voice of Peace, give you inside stories of the final days onboard the MV Peace. By the way, a big welcome Chris, it's a great honour to me that you joined the PC staff! Also welcome to Bjarke Vestesen who has written a very interesting story on the controversial station XMAS. Those of you that have been involved in Free Radio for a while, know that Bjarke was publishing the "Hobby Pirate List" some 10 years ago, the forerunner to the "Free Radio News" address list (published by myself 10 years ago) and "Current Pirate List". PC should now be regular again, at least this year, so please keep sending your infos and stories on Free Radio!

EURO PIRATE SCENE

Edited by Stefan Printz

Angel International is a new appearance on 6219/6220 kHz. The station is from the south of England and also runs on FM. Mark King from ex-Freesound is reported to have been heard on the station.

FDX

Radio Atlantis from the UK were raided on November 27th. Noone was in the studio, but presenter Dean Saunders was arrested and the station's maildrop address was payed a visit. This is believed to be the definitive end of Atlantis. Free Radio can be a high price to pay sometimes, if you're unlucky...

FRS

The first short wave pirate ever from Lithuania, **Baltic Coast Radio**, hit the airwaves via the facilities of **Heavy Dude Radio** on September 19th on 6210 kHz at 10-11. The operator is 29 years of age and got interested in Free Radio in 1991. He'll soon get his own transmitting equipment he says.

TRE

A mysterious appearance was noted on January 16th when a station called **Cadena Dial** came on the 76 metre band (3925 kHz) at 16.15. Looking into WRTH, I saw that it is the name of a chain of FM-stations in Spain. This was unlikely emanating from Cadena Dial itself, more likely a relay by **Radio Piraña International**.

SPZ

Citadel Radio International are producing a newsletter containing inside stories on CRI and other media & Free Radio news. A copy can be obtained for 20p, an SAE or 2 IRC at Box 1218, Chelmsford, Essex CM1 4BD in England. The station also offers station posters, playlists of shows, QSLs and station fact sheets. CRI are by the way relayed by different stations in Europe, recently mostly by the **Belgian International Relay Service** on 6239 kHz.OA SPZ

Radio Delmare is a new powerful Dutch station that has been noted on 48 & 76 metres. On December 5th, the station ran a QSO with **Starshine Radio** on 3910 kHz with 150 W. The signal was excellent according to Maik. Delmare is one of the wise stations to transmit mobile. But they have got a studio for making programmes and a photo on this as well as a QSL-card can be obtained from Box 432, 3330 AK

Zwýndrecht, The Netherlands.

MK

The line-up of Russian pirates continues to grow. Here's an extract from a letter we got from the new Russian **Radio Diamond International**: "The idea of making RDI was born in the beginning of 1992. Since then we have been preparing a studio and making technical items. The first test programmes were aired in the spring of 1992. Unfortunately, the development of RDI was then broken until July 1993. So far we have had tests on July 31st at 19.30 and 21.00 on 7512 kHz. August 1st at 0.00 and 1.30 on 7525 kHz. On August 7th at 18.55 and 21.00 on 7545 & 7509 kHz. The test programmes will now continue to go on air on Saturdays at 19.10 and Sundays at 8.00-11.00. The frequency range we use are 7510-7540 kHz and 7410-7440 kHz. The programmes will include DX, pop music, stories, reviews on books by unknown authors. Our mailing address is Box 35, Moscow 115516, Russia."

SPZ

According to a letter sent to Radio Piraña International, **Radio Fantasma** is a medium wave pirate operating on 1500 kHz. Their address is Box 6587, C.P. 11000, Montevideo, Uruguay.

JRG

Free Radio Norway started transmissions on December 18th on 48 metres and have so far received 15 reports from Germany, Denmark, UK, Finland and Sweden. Because of security reasons, FRN will just be on on an occasional basis.

SPZ

Free Radio Service Holland have often failed to keep their normal regular schedule of 3rd Sunday broadcasts, but for 1994 they will probably make it they say. On January 15th, they could be heard with a fairish signal here on 7425 kHz with their normal type of programme contents.

FRS SPZ

Radio Fusion International are back on 76 metres. A few tests were made the days between Christmas and New Year and recently (January 30th on 3925 kHz) a new end-fed 38 metre longwire was tried out and Jake hopes this will

work good on both 76 & 41 metres. 76 metre broadcasts will go out once a month or so and 41 metre broadcasts once every two months. SPZ

Gold Jazz Radio or **Cool Jazz Radio** (which one is it?) is a new Finn that was noted by Tero on October 24th on 6240 and by Risto on October 31st on 6240 kHz with the Jyväskylä address being announced. RH TP

Heavy Dude Radio is currently off air. Their antenna need to be repaired and there also might be some problems to fix on the transmitter. However, HDR intends to be back during February on the usual 6210 kHz. Last transmission HDR had was on December 12th. SPZ

Idea Radio from Italy broadcasts daily at 5.00-17.30 UTC on 7380 kHz and 17.30-5.00 on 7420 kHz. The transmitter used is a Rhode & Schwarz giving an output of 10 kW. RB

International Music Radio are a new broadcaster from Switzerland and as far as I can remember, there has not been a station from there since the mid 80's with the short-lived **Sound of Switzerland** and the one-time-a-year station **Radio Madison** who always used to be on on Christmas Day each year. Anyway, IMR, who also call themselves "The Voice of Basel", were heard with their first show on October 31st on 6200 kHz via relay. Operator is 22 year old Yves, who now has got his own transmitter (Yeasu FT747) which gives an output of 25 W. He also have plans for medium wave! OA PCH SPZ

Live Wire Radio has got a new address of 14 Stone Row, Coleraine, County Londonderry BT52 1EP, Northern Ireland. Bill now has 500 W in use for 76 metres where he last was noted on Sunday January 30th on 3915 kHz at 1.20-2.00 UTC. Good signals noted here and great programming from Bill as always. Bill is now thinking of building a 1 kW transmitter (!), but he still looks for a modulator transformer that can manage such powerful signals. JAL JRG SPZ

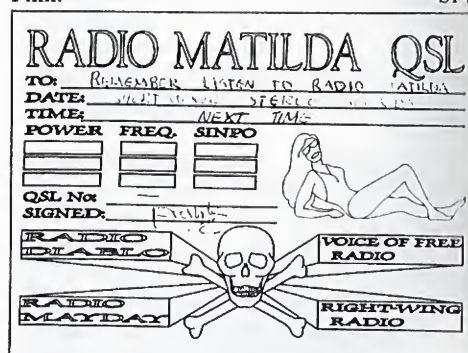

Radio Lowland International are back to shortwave and were noted on October 31st on their usual frequency 6285 kHz. However, they haven't been heard at all lately (as far as I know) but this may be so because of cautiousness against the RCD who always lie in wait for raiding stations a little now and then. The ad-

dress remains the same: Box 39, 2300 AA Leiden, The Netherlands. FRS

Radio Marabu International recently sent us their schedule for the winter season:

WEEKLY SUNDAYS FROM 0900-1000 HOURS UTC ON 7294 KHZ
MONTHLY EVERY FIRST SUNDAY FROM 0900-1300 HOURS UTC ON 6240 KHZ

While being in Stockholm, one of few stations I heard were **Radio Matilda** (c/f PC4) from Finland. Matilda is a joint project between most of the Finnish short wave pirates, ex-Right Wing Radio, Radio Mayday, Radio Diablo, Voice of Free Radio, Radio Kapina and CFM. The transmissions are carried out at get-togethers of the stations. The date for the broadcast I heard was September 19th and they were on three frequencies in parallel, 6240, 6273 & 6281 kHz. The programme contained Finnish pop & rock music and at 8.07 an interview in Finnish was made with **Radio Meteor** (as I understood it). The signal on the latter frequency was extremely good and the other two provided good to fair signals. This was Matilda's third transmission ever, the first one was carried out on March 15th 1992 and the second on February 7th 1993. The fourth transmission by Matilda will most probably be taking place some time this winter, so do listen out for this rare Finn! SPZ

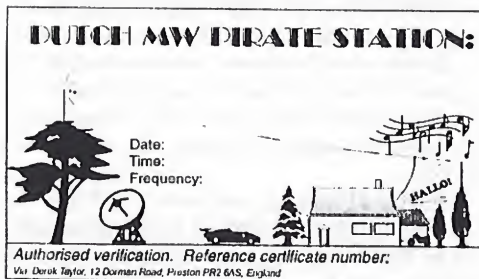

Radio Merlin International raided! We just got information here that RMI were raided on Sunday January 30th at around 12 UTC. We got this info from Bill via Jorge, but Bill had no more further details to give. We'll give you a more detailed report in PC7. However, it's well known that the authorities have been hunting RMI since the comeback of the last raid and they were on the verge of being raided last autumn. This is the story on that: On the Sunday evening of October 17th, RMI had just begun

airing a live programme when Paul Watt (the station operator) saw a row of cars and vans 200 metres away and he immediately shut the transmitter off. When the DTI officials came to the transmitting site, they found the feed of one of two aerials that are used by RMI. Luckily, the one that they found wasn't connected to any transmitter and the DTI officials got rather astonished when they didn't find what they probably were rather sure of to find. Worth noticing is that the first raid of RMI took place exactly two years before this incident! FDX PCH SPZ

Radio Moonlight is the new name of the Dutch station **Radio X**. The change of names is, we believe, due to the station being raided last summer. Moonlight was heard on 3915 kHz on January 30th, QSO-ing with **Live Wire Radio**. JAL

Optimod is a new UK based station that has been heard many weekends lately on 6239 kHz. Optimod is specialised in producing media and radio news, and their media show is updated each month. There is also a magazine with the name Optimod which I guess you can obtain from the station's address in Chelmsford. PCH

Radio Orang Utan was raided on January 16th at around 11 UTC. **Radio Wahnsinn** was to be relayed at 11, but never came on the air. Instead, 4 people from the RCD or police came to the studio and took the transmitter, modulator and 2 tapes. Then they just disappeared. The transmitter was said to have only 100 W. Rather strange, because Freddy always had superb signals despite of conditions etc and from what I've heard he had at least 300 W. RB

Ozone Radio International has been testing several frequencies of late. The latest one is 6210 kHz and it seems as though Ozone will stay on that frequency. FDX FRS SPZ

Radio Pamela have been rather active of late on different frequencies in different bands. In mid-december, another odd frequency was tested, 5871 kHz and a programme was going out there on January 2nd. Just recently, they have been using 5845 kHz. FDX SPZ

Radio Piraña International is a regular contributor to our column and he tells that he got around 100 reception reports during 1993, including 15 from the American continent. 8 of these were from USA and Canada whilst the other came from Argentina (2), Peru (1) and Venezuela (4). During Christmas, he had four transmissions on 76 and 48 metres with both studio recorded programmes and live programming. Last year, "jungle man" built a new transmitter, like the one used in South America. The modulation transformer he bought from Bill Lewis of LWR and gives an output of 80 W. But the transmitter will be re-built to 150 W. This year, RPI hopes to come on medium wave, 1509 & 1640 kHz, which is something to look forward to! Piraña has also started rather regular QSOs on 76 metres Saturday afternoons around 16 UTC. The conditions at that time are favourable and more and more stations are joining the QSOs at that time he says. SPZ

Random Radio sent us a strange letter with strange details on the station and information on how they would like a reception report to look like. Random was heard a few times via **Radio Stella International** on 7446 kHz last autumn, but the future is uncertain due to the operator, who calls himself "Robert on Mike" (is he gay??), suffering from internal problems. PCH SPZ

Radio Safari is a new Scandinavian that hit the air this autumn via the **Swedish Short Wave Relay Service** on 6262 kHz. The station was last on the air on Christmas Day and played mostly hits from the mid-80's. A very strong signal was noted here. You can contact Safari via the well-known Wuppertal maildrop. SPZ

Short Wave Radio Switzerland will start airing other stations on February 5th. Listen out on 7125 kHz (IRRS - Italy transmitter) at 12 UTC when a radio station from the Caribbean Sea will be relayed! The station is called **Calypso Radio** and plays hot "sunshine reggae music"! Could it be more exotic? SWRS

also offer other pirates to use the relay service for \$40/£25 for 30 minutes. The power is 10 kW. For further details, write to SWR Switzerland, Box 35, 6027 Romerswil, Switzerland. PG

Radio Silverbird International returned to short wave in August and was last noted on January 23rd on 6258 kHz. Signals were reported as good both here and in the UK. SPZ XTC

Southern Music Radio from the other side of the earth (New Zealand) has had to find a new relay service, as **Radio Waves International** are soon to close down. SMR will now rely on the BIRS relay service on 6239 kHz and will be aired on a bimonthly basis in February, April, June, and so on. A 30 minute programme will also be produced for the final weekend of broadcasts by RWI during Easter. SPZ

Radio Sperenza is a religious broadcaster from Italy on 6233 kHz. The address is Reverendo Padre Sacerdote Luigi Cordioli, Largo San Giorgio 91, 41100 Modena, Italy. Phone: +39 59 230373. FS RB

Another new relay facility is the **Swedish Shortwave Relay Service** (SSRS). They were first heard on September 11th on 3908 kHz at 23.30 and an hour later on 3905 kHz. The programmes gave a 'shady' feeling with a dark-voiced guy as presenter who was hard to understand... Anyway, SSRS now offers relays for Scandinavian stations and other stations that want to be heard in Scandinavia. The service should be rather cheap (maybe even free of charge?). Contact SSRS at the Wuppertal maildrop for further details. SPZ

Quite surprisingly, **Süd West Radio** were noted here on 76 metres on December 28th and they were testing many frequencies. At 21.15 they were on 3905 kHz, signed off 21.30 and then came back around 22.00, interfering **Radio Fusion International** on the same channel. Also 3910 was in use according to Free-DX, although not noted here. The programme featured modern dance music, such as Robin S "Luv 4 luv" and DJ Bobo "Keep on dancing" and a phone number was also announced for listeners to call to. Signals were fair. SWR were then heard again on Saturday night January 22nd on 76 metres, now using 150 W. Signals were good here. FDX JAL SPZ

Sunshine Radio is new to shortwave and was relayed via **Radio Orang Utan** on 6200 November 28th. MK

Radio Tornado is a new pirate from Lithuania. The station was noted via **Jolly Roger Radio** on November 6th & 7th and on November 28th via a Dutch station on 6205 kHz with short programmes. Address: Box 493, 5802 Klaipeda 2 in Lithuania. FDX MK

Transatlantic Radio comes from the land of very many pirates (Holland) and received no less than 50 reports for their first broadcast last summer. This is an amazing response these days, especially knowing the station only has 10 W of power. The antenna used is an inverted V dipole 22 metres above ground which certainly works very efficiently! During the past months, further tests have been carried out on 6201, 6241 and 6266 kHz. The main frequency will be 6241 kHz and you can expect the station here each third Sunday of the month. PCH

Radio Wahnsinn publishes a new Free Radio mag which you can obtain from them for 4 USD or 5 DM reports Jonny. Unfortunately, neither he nor me have seen the mag, so a review of it will have to wait until PC7. JAL

Wave Radio International has been rather inactive of late, but should return to the normal broadcasting intensity soon. On October 15th, WRI made a venturesome appearance on 11 MHz after the annual broadcast by **Radio St. Helena**. He was on for 30 minutes or so and should have had many listeners, as the "St. Helena Day" is something many DX-ers look forward to and try to catch this rare station. For this occasion, WRI had made a specially built aerial which took him one week to build! WRI has just recently printed QSL-cards and all that has sent him a report should receive the QSL below in the near future. PCH SPZ

Radio Waves International have taken the decision of closing down the station after 10 years in operation. The reasons for this are mainly lack of spare time. But Peter Hills says there's no way back after having been infected by the "Free Radio Virus", so he'll surely be heard from time to time on other Free Radio stations. The Rueil maildrop will continue and programmes will go out irregularly until Easter this year. Then we will see the definitive end of RWI. Let me take the opportunity to thank Peter for all the years of much listening pleasure and many interesting relays. I still remember the first time I tuned into RWI and a relay station called **Radio Pacific** back in the summer of 1984. Since then I've spent many, many hours on 7440/11401 and all the other frequencies that have been in use. I guess RWI must have been one of the most regular stations ever in the history of Free Radio! RWI SPZ

Radio Without Borders International were sadly raided on Tuesday August 10th by the Russian authorities. RWBI were not on the air while the raid was carried out, but three transmitters were confiscated as well as some studio equipment. I made a phone call to Igor on Thursday, but he didn't seem to be there anymore. A woman answered the phone (exchange operator?) and just replied "Michael?" when I asked to speak with Mr. Igor. I feared that the worst had happened to Igor (that is, taken into custody), but I was very relieved a month later (September 19th) when RWBI were heard with their comeback programme on 3917 kHz. What had happened was this: Igor was called up to a court session and faced the charge of having "used broadcasting equipment illegally". The outcome of the session would most probably have been a confiscation of the equipment

plus a penalty. But it all got an unexpected new turn. Igor had made a detailed study of the Russian law and found out that the Act used against him could in fact only be used provided that the authorities proved real facts about the illegal broadcast events. But since Igor was not even at home when the raid was carried out, the court judge decided to ask the Radio Control Inspection for more evidence on RWBI and a new session was held a week later. Nothing could be proved against Igor and besides Igor's lawyer found more loopholes in the lawbook, so the authorities had to return all the equipment! What a triumph for RWBI! Congrats from us at PC. FRS SPZ

World's Greatest Anorak Station - WGAS are new to shortwave and have been noted quite often the past months. The first broadcast is believed to have taken place on August 21st when 6475 kHz was in use. The station consists of a line-up of well-known persons, including Andy Walker, Terry Phillips, Dave Martin, Steve Conway and Jack Russell. Programmes now go out on the 48 metre band and was last noted here on January 23rd with a strong signal on 6279 kHz. The power is believed to be around 100 W. 3 IRCs or 3 USD are demanded for a reply from the station. WGAS also offer a relay service which costs £5 per hour. Further details you get by writing to the Rueil maildrop. FDX MK PCH SPZ

[illegible]

At the time of writing there are currently two ship based radio stations operating in the world, with possibly a third on air by the time you read this. Rumours always abound of new offshore stations about to start up, but these rarely reach reality.

In Europe, Radio Brod, translated simply as "Radio Boat" in Serbo-Croatian, has been broadcasting to the former Yugoslavia since April 1993 from off the Italian coast. Operated by the French "Droit de Parole" (Right to Speak) organisation, the radio ship is also called "Droit de Parole". The station has just recently had its backing extended until February 1994, at which time the situation will be reviewed.

At the end of June, the "Washington Post" reported that the station had been silenced by a dispute involving a Serbian strongman, a UN agency and a tiny Caribbean nation. The result of this was that St Vincent withdrew its flag on 28th June. The French paper "Le Monde" reported on 2nd August, that after the flag had been withdrawn, St Vincent discovered that the "Droit de Parole" was supported by the European Community and reinstated the flag for three months.

The British media has virtually ignored Radio Brod, despite almost daily carrying reports of the civil war and atrocities in the former Yugoslavia. The only coverage has been a BBC radio feature, speaking in this, station presenter Miya Lobsovitch compared the radio ships broadcasts with a relief operation "Somehow it's like the air drops over Bosnia, no one expects that those air drops are going to feed the whole population that are starving there. But if we can feed a couple of hungry ears that's enough."

Radio Brod returned to the air at the start of August on their former 720 kHz frequency and can be heard in central Europe between about 0.00 and 4.00 UTC, when other stations on the same frequency, such as BBC Radio 4, close down for the night.

For just over 20 years the Voice of Peace has been broadcasting "from somewhere in the Mediterranean" - actually just off the coast of Israel. However with the recently signed peace agreement between Israel and the PLO, the stations owner Abie Nathan declared that he had achieved what he set out to do with the radio station - Bring peace to the Middle East, and that he was closing the station down. In a radio interview, Nathan also gave another reason for the close - the station was heavily in debt.

On Friday 1st October 1993, at nine in morning (local time), Abie Nathan was onboard the Peace ship and started the last programme, telling some of the history of the station and the problems that had been encountered. Abie ended the Voice of Peace's transmissions and instead of playing John Lennon's "Give Peace a Chance", he chose to close with Pete Seeger's "We shall Overcome". Prior to this he again thanked all the listeners and asked everybody to sing, very loudly, with him the last song ever broadcast by the Voice of Peace. While playing the song, Abie said "Thank you all... Shalom... Love, peace to everyone" and at exactly three minutes to two in the afternoon (11.57 UTC) the transmitters went off the air.

After closing down, the Peace ship upped anchor and sailed into Tel Aviv accompanied by a flotilla of around 30 small boats of well wishers. Abie stood on the ships deck dressed in a white shirt, the first time he'd done so for many years. "Time" magazine for 11th October, reported "For more than 12 years I have been wearing

black in protest against the unwillingness of my government to talk to the PLO. Now that both sides are talking peace, I can at least change my clothes. I'm wearing a white shirt, my best white shirt", said Nathan, who was also seeking a license to broadcast onshore.

After the Voice of Peace closed down, there were stories that the ship would be turned into a peace museum. Abie had also previously planned to set fire to the ship or to deliberately sink her. On Sunday 28th November 1993, it was indeed that latter option that Abie surprisingly acted on. After opening all the seawater inlets, the MV Peace slowly sank into the Mediterranean. A rather sad ending for the radio ship.

Still broadcasting off the coast of Israel is the Arutz Sheva from the MV Hatzvi. Meanwhile over in the United States of America, a new radio ship has recently started out. Allan Weiner, former operator of Radio New York International, from onboard the "Sarah" during the late 80's, has now purchased a new ship, the MV "Fury", a former trawler of the Ross fishing fleet. This has been fitted with two 40 kW and two 10 kW shortwave transmitters.

The new shortwave radio ship is being operated by "Voyager Broadcasting Services". Finance for equipping the ship has mainly come from evangelist Brother R. G. Stari of "Overcomer Ministries", who will have exclusive use of one of the transmitters. Brother Stair's programmes are currently heard on international shortwave broadcasters WWCR and WRNO New Orleans.

On 5th November 1993, at seven in the morning, local time, the Fury left Boston harbour under her own power, heading for South Carolina, where she was due to be repainted. The Fury has now been fully licensed and registered and is expected to be at her Caribbean anchorage and broadcasting before Christmas. Among frequencies that the station may use include 6240, 6275, 7415 and 13030 kHz.

Allan Weiner stated that "All of us feel this stations will be a success. We are taking the time to make sure all is legal and proper. In this new world order it is the only alternative. We pray soon this new offshore station will be on the air broadcasting its message of peace, love, hope and hapiness to the world."

More detailed news and photographs of all of the above radio stations can be found in Offshore Echo's, the world's only magazine devoted to offshore radio. For a copy send 3.60 pounds, or equivalent to Offshore Echo's, P.O.Box 1514, London W7 2LL, England. For a free catalogue of offshore radio records, CD's, books, videos etc, just send a large SAE or 2 IRC's to same address.

Update on MV Fury by Chris Lobdell: On Wednesday, January 19th at about 8:30, FCC field office officials along with shotgun toting federal marshalls showed up at the MV Fury II anchored in the harbor of Charleston, South Carolina. They had a court order to seize and remove the transmitters. Al Weiner, the project manager was on board. They then proceeded to remove the transmitters with welding torches and a crane. The reason for the raid was that two illegal "read pirate" broadcasts that took place on Christmas and New Years' weekend by a DJ called Johnny Lightning were traced by direction finding equipment to the ship. Al Weiner disputes this saying the vintage World War II transmitters were not yet operational and not even wired to the antennas. The only operational radio, according to Mr. Weiner, was the marine radio in the bridge. No criminal charges were filed and after the transmitters were removed, the ship the FURY II would be returned to Mr. Weiner.

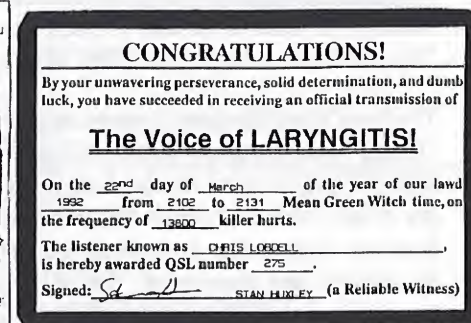

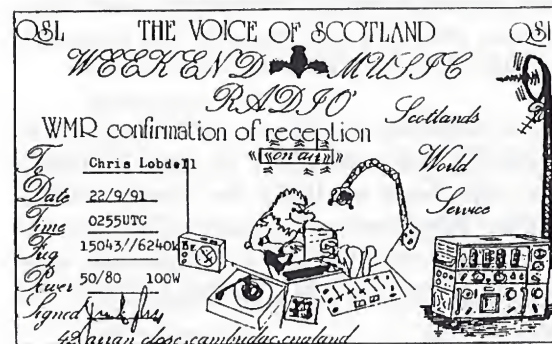

Well folks, here we are again with another report on what's happening in the American pirate radio scene. As we enter the low part of the current sunspot cycle, the maximum usable frequency is dropping below 7 mhz before sunset, making this frequency range good only for long distance reception. Maybe some stations will soon move into the 3400-3500 kHz range in order to be heard within the local area. European DXers should keep an ear tuned to 13900 kHz for possible reception of American stations as some have been noted between 1500- 2000 utc. Good luck!

October started off with programs from MIDNITE RADIO (BRS), noted 0140 utc on 7470 kHz on October 2nd. This pirate featured the "Slam and Zwol" talk show with included the subject on how to sexually harrass your female co-workers and get away with it! Also noted in early October was RKNA (The Rock Of North America), noted on 7410 at 2315 with DJ Harry I. Ball. Lots of laughter and rock music was heard on the 9th of October. A new station, WSM (Grand Ole Oprey Radio) playing C&W music from Nashville, TN was heard at 2300 on the 16 of October on 7413 kHz. They use the Huntsville, Alabama maildrop. WLBG (address unknown) which stands for We Love Bob Grove popped on the air just in time for the Monitoring Times convention in Atlanta. Noted at 2305 on 7415 kHz October 15th. The DJ tried to interview George Zeller, announced equipment for sale at bargain prices, but quickly left the air as we attempted to interview Jonas of the FCC!

The Halloween weekend was very active as usual. May stations were heard, including WITCH CITY RADIO (Wellsville) on 7470 at 2345 on October 30th, HE MAN RADIO on 6666.6 kHz at 2300 on the same date. OMEGA RADIO (Wellsville) was heard at 0025 on 7465 kHz on the 31st. Also heard on the 31st of October, was RADIO ANIMAL of WKND noted at 2300 on 7415.5 kHz. Despite using a small power transmitter, his signal was well heard. He has issued a very attractive QSL card for this show. Others noted were RADIO AIRPLANE, RADIO HALLOWE'EN, ALTERED STATES RADIO, WREC, CSIC and RADIO BEAVER.

The month of November brought us a relay of the Swedish pirate HEAVY DUDE RADIO. Noted at 2300 on 7416 by the NAPRS, we heard Hawk and Heavy Dude play music by Harry Belafonte, Metallica and Santana. This relay was noted on November 6th and the Lund, Sweden address was given for reception reports. SECRET MOUNTAIN LABORATORY was heard again after a long absence. Noted at 0345 on the 13th of November on 7465 kHz. Programming consisted of an AD for Bob Dylan nasal spray, music by Joni Collins, talk about punctuation marks. WKIK (Wellsville) was heard briefly on 7410 kHz on the 14th of November. They were running a test broadcast at 0515 utc. This station has still only issued one QSL card and has asked that it be returned! A new station RADIO FREE SALVATION (Huntsville) was noted on the 21st of November at 1440 utc featuring Christian rock music and a short sermonette on 7416 kHz. Every year for the past few years on the Anniversary of the Assassination of President John F. Kennedy a pirate station called WJFK appears. This year was no exception. WJFK (address unknown) was heard on 7415 kHz at 2315 kHz on November 22nd. Programming consisted of the song "Sunny" by Bobby Hebb, "Abraham, Martin and John" by Dion, a terse "This is WJFK" ID and sign off. Although

no address was given, QSLs have been issued for loggings in the Pirate Pages. The round out the month of November, RFM (Radio Free Massachusetts) was heard on 1620 kHz at 0300 utc on the 27th playing new age instrumental music and announcing the Wellsville drop. H.V. Short is an excellent QSLer.

December arrived with quite a bang. To start off the month, the pro-marijuana outlet RADIO FREE EUPHORIA was heard on the 5th at 0200 on 7390 kHz. Although co-channel with Radio Moscow, the signal held its own, even overpowering Moscow in Kansas! Programming consisted about growing and smoking pot along with music by the Who. This station uses the Wellsville drop and QSLs quickly. WJLR is one of the more powerful stations around these days. The call letters stand for John Lennon Radio and they use the Blue Ridge Summit maildrop. They were heard on 7435 kHz at 2040 utc on the 4th. One of the newest pirates to enter the scene is RADIO DOOMSDAY (Wellsville). The station was heard testing on 7469 kHz on the 5th of December at 0000 utc. Radio Doomsday was probably the most widely heard pirate of all 1993! Good reception was noted by listeners from the coast of Massachusetts, New Mexico, Florida and Wisconsin. The operator of this station calls himself Nemesis and operates a very professional operation. His New Year's show featured an interview with Elvis Presley and Canadian comedy by Red Green. The station verifies quickly and has a very attractive "globe/human skull" QSL card. The GREAT SOUTHLAND (Merlin), is a station of Australian origin relayed by an unidentified North American station. John Quigley played rock music, said to enclose \$1.00 US/ Australian or \$1.50 NZ for a QSL and invited us to drink a beer with him. His outlet was noted at 2240 utc on 7414 kHz on the 4th of December. The seasonal outlet, HAPPY HANNAKU (Merlin) made several appearances during December. It was first noted on the 5th on 6295 kHz at 0131 utc. Programming consisted of festivities celebrating the Jewish festival of Lights. Several pirates were heard with Christmas shows. Phil Muzik at KNBS (Wellsville) aired a seasonal show at 2000 on 7420 on the 24th. PIRATE RADIO BOSTON was no exception. Their Christmas show was noted at 2140 on 7435 kHz on the 18th of December. Letters were read from listeners and Christmas reggae music was noted too. LIBERTIES was a new pirate heard on 7415 kHz at 1517 utc on Christmas. Audio was a bit scratchy, but programming was worth listening to. It featured a promo for Bush perfume, and a skit about a college co-ed who could afford to leave Palm Springs for Christmas vacation. They use the Wellsville address. To end December THE VOICE OF THE RUNAWAY MAHARISHI was heard at 2231 on 7413 on the 31st. This station is actually a division of RADIO FREE EUPHORIA and features a pro-pot format. Other stations heard during December were ALTERED STATES RADIO, CHRISTMAS DAY RADIO, CSIC, OASIS RADIO, RADIO AIRPLANE, RADIO AZTECA,

- W - WELSH PIRATE
- Y - YUGOSLAVIAN PIRATE!

IMPORTANT: NEVER PUT "RADIO" ON THE ENVELOPE, USE THE STATION NAME ONLY OR INITIALS.

Radio Matilda is a joint venture of many Finnish pirates-tations and -operators. So far stations like Right-Wing Radio, Mayday, Voice Of Free Radio, Diablo, Kapina and Wega have been involved. Since the first joint transmission at spring 1992 Miss Matilda had to be silent a long time because of military service, huge cashprice in lottery, unemployment, employment and a dozen other irrelevant reasons. It wasn't until January 1993 when something started to happen again.

A young Finnish free radio enthusiast, DJ Mega Wattti, wanted to start his own SW-piratestation. He needed advice, information and contacts, also help from other stations. For that reason he offered to organize a joint SW-transmission to get experience and to meet older and more experienced free radio people.

DJ Mega Wattti made contacts with other pirates around Finland to decide the day, time, etc. necessary details of the transmission. The transmission day was going to be 7. February 1993 and the transmittersite was going to be a farmhouse in the deep forests of south-east-Finland. One reason in selecting that place was the rumour of a lion living in that part of Finland. It was thought that even THK (=Finnish FCC) might be afraid of the lion...

The invitations were mailed soon and in the end of January Mega Wattti was receiving "bookings" from people and stations who wanted to join the project. A good amount of people did "register", and a new Radio Matilda-project was sure to take place. It was also decided to travel to the transmittersite already on Saturday and build the station during the Saturday night.

During the Saturday people started to move from all around Finland towards the transmittersite near the Russian border. Your PC-editor travelled there too with one car full of people and equipment. It was quite hard to get to the transmittersite, as it was really far a way from everything. After we turned away from the last paved highway we had to drive still over 30 kilometres along small forestroads which were covered with solid ice! Our speed was 20-30 kilometres per hour as it's best.

Anyway, we did get there. On the farmhouse there were Mega Wattti, his parents and 2 Valmet-tractors. In one room of the farmhouse there were a ready to use studio. The pirateoperators were offered a possibility to sleep in the warm and nice main building. The operators were also told that for transmitters there were a small cottage and sauna on the beach of a small lake just few hundred meters away from the farmhouse. And there were a hole on the ice of the lake so that people could swim there. When our bunch of hard headed pirate operators who have all served in the Finnish Army heard about this small cottage, they all went straight away to set a fire to the sauna. DJ Mega Wattti and his parents had no possibilities to stop them.

People and gear

Soon the cottage and the sauna were warming up and it was time to look what we've got. In the studio there were a Monacor 6-ch mixer, 3 CD-players, 2 cassettedecks and the necessary microphones.

5 SW-transmitters were on place and the sixth could be get in working order in just 2 hours time, if needed. All transmitters were home-made valvetransmitters. We also had a huge amount of modulationamplifiers, wires, coaxialcable and all kinds of gear.

One 48 mb SW-dipole was already hanging on the trees near the farmhouse. Other dipoles were still in pieces, but they should be put together and lifted to the trees during the night.

On the farmhouse there were a small FM-transmitter (0,5 W). This FM-transmitter would be used in relaying the programsignal from the studio to the saunacottage, where most of the SW-transmitters would be situated. The FM-antenna was a Slim Jim.

On site we had our main man DJ Mega Wattti, Frank N. Stein and the Technician from Radio Mayday, the operator of Radio Diablo and DJ Tex Willer and DJ Saigon from Right-Wing Radio. Tom Collins from Voice of Free Radio was not able to arrive on Saturday, but he should join the others early on Sunday morning.

On Sunday we would also receive more help. 2 local free radio enthusiasts would come and block the road with the Valmet-tractors in case police and THK would come too close during the transmission. The guards could block the road (there was only one road coming to the transmittersite) with snow and watch for the possible approaching cars. If police or THK would approach, the guards would give a warning by CB-radio to the transmittersite. The operators would have enough time to close down the station, hide the transmitters to the forest and warm the sauna for THK.

The necessary sleepinggear were carried the the cottage. DJ Mega Wattti provided us among other things with 24 bottles of beer, 24 bottles of "other things to drink" and a good amount of sausages, etc. Later in the evening even more six-packs did show up in a strange way from secret locations...

Action?

During the night we lifted 3 antennas in a very hard and cold wind. 1 antenna to the farmhouse and 2 antennas to the cottage. The temperature was around -15 degrees Celsius. One antenna was for 9 MHz and the 3 other for 48 mb. At the same time the transmitters were located to the right places and we wondered how to get electricity to all transmitters.

A part of the operators were testing the FM-link/relay and they found out that the coaxialcable to the FM-antenna was broken and some components of the FM-transmitter were blown. That's why we decided to forget the 0,5 watts micro-tx. Other possibilities were to use a 35 watts FM-transmitter as a link, take the program-signal from a SW-transmitter which would be located in the studio or build a telephoneline from the studio to the cottage. This should be decided during the bath in hot sauna.

We were able to start the bath in sauna around midnight. Some operators were at the same time listening to the SW- and MW-bands for any possible pirates, but without success. No-one dared to swim at the lake... Sausages were warmed on fire and eaten with pleasure. Six-packs got empty... and men full...

Some of the operators got fascinated about the idea of building a telephoneline from the studio to the cottage. The distance was approximately 500 meters. After an hour or so Saigon, Mega Wattti and Frank N. Stein went out to the cold night to build a line. Mega Wattti had 500 meters of telephone cable which should be enough. The only problem was that the cable was NOT on a neat package. No, it rather looked like a nightmare...

Others were already sleeping when Frank and Mega Wattti came back to the cottage at 3 o'clock. A little bit later also Saigon came back. The boys had been drinking too many six-packs and they had a "small" argument about the idea of building a telephoneline. They said that over half of the line was ready, but they needed

some help in building the rest. Nobody wanted to go out and after an hour everybody was sleeping.

Around 5 o'clock Mega Watti for some reason got awake and went to continue the linebuilding. When we woke up in the morning, the other end of the line was truly in the cottage! We were wondering how this could be possible - untill we went out to watch the sunny wintermorning. Yes - the other end of the line was in the cottage, but the line was only 20 meters long instead of the needed 500! Later when the lineroute was examined, it was found out that the telephoneboys had build about 30-40 meters of the line in the middle of the forest and later Mega Watti had built 20 meters more close to the cottage. The only thing missing was the first 200 meters from studio to the forest and the 150 meters between the two pieces of cable... "Great" work boys...

Let the hundred watts shine

Early in the morning the operators divided into 2 groups. The first group gave the finishing touch to the transmitterassemblies in the cottage and the other group walked to the studio in the farmhouse. We decided to use only 4 transmitters at the same time, as we couldn't lift more antennas easily. The SW-link had to be used to get the programsignal to the cottage, as the telephoneline was a "bit" too short and 35 watts FM-link was too powerful and it might attract the THK's attention.

At the same time Tom Collins (Voice of the Free Radio operator) and 2 guards arrived to the farmhouse. The guards took the Valmet-tractors and headed towards a suitable location to block the road. Tom Collins moved gear and people between the 2 action-sites. Mega Watti tested the CB-connections between the guards, the transmitter site and the studio.

In the same location with the studio there were a 45 watts SW-transmitter for 6258 kHz and a 30 watts transmitter with a 9980 kHz-crystal. In the cottage there were transmitters for 6225 and 6281 kHz. These were the frequencies that seemed to be free of interference according the bandcheck we made just before we divided into groups.

DJ Tex Willer started to test the studio at 0800 UTC. At 0810 UTC Radio Diablo operator kicked on the 6258 kHz transmitter and Boney M. ruled the waves. 9980 kHz followed straight away and the live show was in full swing. Tex Willer took care of the beginning, later also Saigon, Frank N. Stein and Mega Watti were able to show their talents in live pirate radio. The music was mostly disco, but DJ Saigon played also some tracks of both old and new rock'n'roll. The Money M. compilation-CD was just released in Finland in February and they got very much airtime. As RWR-boys Tex Willer and Saigon were in studio, you couldn't pass a huge amount of jingles, effects and echo-o-o-o-o-o-o...

In the cottage in was soon found out that one the two antennas there were showing bad SWR-ratings and couldn't be used at all. The other antenna was connected to the big 90 watts Mayday-machine, which blew up. Finally we were able to use a smallpower transmitter (25 watts) on 6225 kHz. The programsignal was taken from the 6258 kHz-transmitter, which was located in the studio.

The troubles with the gear didn't end yet. Soon after the beginning the Radio Diablo's 9980-transmitter start transmitting carrier only. There was no modulation on the frequency at all. A bit later the transmitter started to give some smoke to the studio and DJ Saigon had to disconnect it in a hurry. From the cottage we carried one extra transmitter to the studio to replace the 9980

one. We gave it a 6281 kHz crystal and connected it to the 9 MHz antenna with an antennatuner.

Also the studio was giving trouble. The Monacor mixer couldn't handle all the RF. There were too many transmitters in the same location. It just went crazy. Same music could come from all channels, CD could stop by itself and the microphones made strange distorted voices at times. It was also difficult to keep the modulationlevels high enough.

In the cottage the modulationamplifier was not strong enough and the modulationlevel on 6225 kHz-transmitter was far too low. Later 6225 was switched off and the rest of the show was transmitted only on 6258 and 6281 kHz. Those transmitters were both in the studio.

Around 1025 UTC we had been on the air almost 2,5 hours live, which is quite exceptional and dangerous in Finland. We decided to close down as long as we are not forced to do so. At 1035 UTC the two transmitters were disconnected after the necessary announcements. The guards had seen no sign of police or THK.

It took few hours to disconnect all the gear and pack it. In the end of the project we all sat in the coffeetable together. We all thought that this second Matilda-project was OK, although it didn't succeed as well as the first one in 1992. Maybe next time we can beat all the troubles we ran into this time. Transmitting is learning.

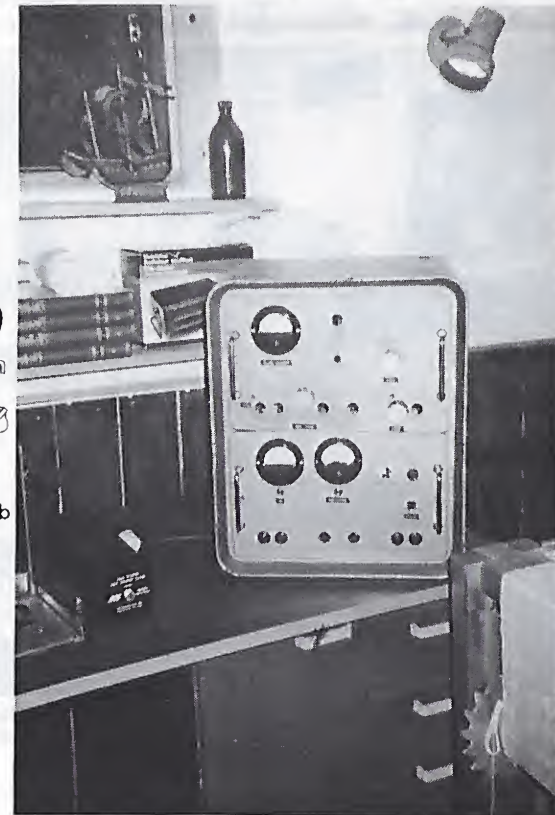

If you were listening 7.2.1993 or you hear Miss Matilda on the airwaves some other time in the future, please send your reception reports to the Wuppertal-maildrop with 1 IRC. Matilda will be back!

Voice of Peace

By Nathan Morley

On October 1st the world famous offshore station "The Voice of Peace" closed down transmissions for the last time. The final weeks broadcasting was a series of special programmes featuring nostalgic artists, commentaries about the station by owner Abie Nathan and a selection of normal programmes by the last team of DJs on board the ship. The station which brought "Peace, Love and Good music" from somewhere in the Mediterranean" finally closed after over 20 years of ruling the airwaves of Israel. The close was partly for financial reasons and because of the Peace agreement between the Israeli Government and the PLO, a move the station had always been in favour of. The on-air team was headed by Kenny Page (formally head of music at Radio Tay) who had been with the station in the 1970s and rejoined in 1987. The DJs included Matthew French, Nathan Morley, Paul Harper, Bill Sheldrake and Clive St Clair. Speculation that the ship was to close came a few months earlier when Abie requested a countdown be broadcast after each news bulletin to the effect "...Only 50 days to go...". At the time there was a lot of press coverage announcing the ship would be sunk - a reality the staff would soon find out. When the DJs were informed of the ships fate, Matthews French and Nathan Morley were told by Abie to throw all the broken equipment, old records etc over board. The final week was staffed by only four DJs as Kenny and Paul had gone ashore, not knowing that they would not return. On the final day Bill, Nathan and Clive left the ship at 7.00 AM, leaving Matthew with Abie for his final speech (Matthew remained with the ship until November 15th). Later that day there was public protests, wide TV coverage and a general feeling of loss, not only to the countless thousands of listeners, but to all involved with the Voice of Peace. All of the DJs were offered jobs with Israel's latest offshore station Radio Hoff (Radio Beach), but after negotiations refused. On Sunday November 28th 1993, The Peace Ship was sunk off the Israeli coast.

DJs Matthew French, Paul Harper, Bill Sheldrake and Nathan Morley during the final weeks programming.

QSL-Collection

Hello and welcome back to QSL-corner. Here are some fresh and some old loggings. If you use shortwords, not explained here, please explain them. I'm not a god guesser. Now when we are using this layout, we have the possibility to include bribes like IRC's, Dollars and SAE/SASE.

PIRATE STATION AIRED PHONE SEX!

XMAS offered another controversial programme during Christmas

By Bjarke Vestesen

Each Christmas, one of the most controversial pirate stations, XMAS Radio, is on the air. This Christmas the station aired raw, groaning and unmitigated Dutch phone sex on shortwave - to great delight for some listeners, to great annoyance for others.

XMAS is no doubt the black sheep in the world of pirates. Many of the more established pirates announce each Christmas that they have got nothing to do with XMAS. Still, the question of who are behing XMAS, is a well-kept secret.

Blasphemies

XMAS was heard for the first time around Christmas 1989. They played jazz and progressive rock music plus, not to forget, a sex show by the DJs "Virgin Jane" and "Lusty Louise". The following year - Christmas 1990 - the station came back in the same style with insults and dirty talks. Looking back at a log of the station in DX-Fokus 1/1991, it reports: "An obscure and uncontrolled programme with blasphemic contents. The DJ assured that he was "high" by junk. Christmas 1991 and 1992 saw the same mixture of bizarre music and gross insults to the listeners.

Raw phone sex

Christmas 1993 was no exception. XMAS continued the controversial and bizarre lies, and nothing seemed to be inviolable. They broadcasted raw, groaning and unmitigated Dutch phone sex on Saturday December 25th and Sunday December 26th on 3910.9 kHz

the whole evening and night. First a programme from a Bulgarian University was aired. Then came the phone sex programmes, without fees for the audience of course... In a fax message, the station also say they were on 7590 kHz in parallel, but this was not received in Denmark.

Don't care a damn about the listeners

The listeners are not going to get any QSL-cards, nice stickers or anything else from XMAS, because they don't care about the listeners and don't have an address for mail.

When a Swedish DX-er tried to get a QSL from the station back in 1989, a reply was actually sent a year later, but with the note "This is not a QSL of your stupid reception report. Fuck you!".

Previously published in DX-Fokus January 1994. Translated by Stefan Printz.

Kim Hawk's Starry Thoughts

Buurp! This is a usual after-taking-a-beer-roar, que? What have happened to the 76 mb? Once upon a time it was a place without any disturbing noises. Now during summer, autumn and winter it have been more noise then FR-stations! Are there perhaps some evil persons, that wait until a band has gone popular, and thereafter they decide that that band should be a new utilityband. Or what? Last time I wrote KHST, I said that FR-stations should'n't disturb other FR-stations, but I don't think I'm in possession of telling those maniacs to stay of the air. We have to build stronger transmitters! Or should we find a new band? Well, personally I think we have to wait and see. I have received reports from all over europe with good to fair reception, but nevertheless the amont of reports are still less then the guys on 41 & 48 mb get. So all 76 mb stations out there, do something. I don't want to do everything by myself. (hi) All those QSO-stations, do programs! Of course it's nice to have a chat after a show, but it's also nice to hear another station start up right after your close down.

Stations like Pluto, Pacman, Jimmy and maybe H, must have had some problem during autumn/winter. Weak signals and compite with broadbandstations like LWR. You got my symphathy. What have happened to the LWR-transmitter? Once upon a time, it was a good one. You had a little chance to be heard if LWR whent on air. Today you can close down if you are on 3905 and LWR begins on 3920 kHz, none will hear you. A man with the right FR-spirit, is Frank of Radio Delmare. The 5'th of December this Dutch man made a short test on 3.9 Mc. 76 mb is big enough for more tests from Dutch MW-OP's - Welcome to join the 76mb-family.

But remember- Audio before power. Please. Give Jolly Jake at Radio Fusion a chance.

And you, DX-ers out there, have you not any kind of morals? Writing reports like; Show starts - music - show end. And aspect to get a QSL?! If you listen out well, you can hear me laughing. I know that most of you just whant my QSL, but do something to earn it for heaven's sake.

Before I end up those evil and good thoughts of mine, I will just remind you that Starshine will do some tests on 48 mb during winter/spring time. Check frequencies like 6210, 6240, 6255 and 6280 kHz from 08.00 UTC. Thanks to the Jungle Man for the entertainment during H-mas. Nice piece of art.

Okee, take care of yourselves, byebye and cheeeerrrrriiiiiiooooo.

Kim Hawk
